

Today Breast Cancer is a major health risk to all women because it silently grows and destroys, uninterrupted for 10 years. Early detection and prevention is the key.

The technology is here in the greater Milwaukee area. Digital Infrared Thermal Imaging takes a thermal picture to determine abnormalities or changes in the breast tissue. Thermography can detect irregular patterns and early stage cancers 7-10 years before a mammogram. Best of all, Thermal Imaging is painless, non-invasive and has no radiation.

Take \$25.00 off your initial breast scan at the Longevity Center. (New clients only, please). Coupon may be used at the Elm Grove location only. Not valid with any other special or coupon.
